

GOOGLE SCHOLAR

Compiled by Helene van der Sandt

WHAT IS GOOGLE SCHOLAR?

GOOGLE SCHOLAR:

- Is a search engine that searches for scholarly literature
- Can search across many disciplines
- Searches for articles, theses, books, abstracts, court opinions from:
 - Academic publishers, professional societies, online repositories, universities and other web sites
- Not all articles will have free full text
- Some articles are linked to library resources if you work on campus
- Future wish list: to have all our library resources linked to Google Scholar on- and off campus, if we can overcome consortium and budget restrictions
- At the moment if not linked to full text, check in Library Catalogue for print or electronic copy

**WHERE DO I FIND
GOOGLE SCHOLAR?**

A horizontal bar spanning the width of the slide, composed of several colored segments: dark blue, orange, green, light blue, and dark blue.

BASIC SEARCH

Google Scholar Basic Search

- Google Scholar's homepage is its basic search.
- This is a single search box, just like normal Google.
- It is a simpler format, but it will give you access to the same resources as the advanced search.

TITLE SEARCH

- Put the paper's title in quotations
- Example: "A history of the China sea"
- Google Scholar will automatically find the paper as well as other papers which mention it

Keyword Search

- Decide on the main concepts (keywords) of your topic
- Avoid words that are vague or have multiple meanings
- Also think of:
 - Synonyms
 - Alternative spellings
 - Abbreviations / Acronyms
 - Broader or narrower meanings of your original keywords
- You may lose lots of useful information if you do not search for the alternative terms of your keywords

Combining Keywords

- Type in all the keywords that must be present in your search results
- For example: You want to see if chocolate makes people happier.
- Keywords: happiness chocolate (Google Scholar automatically puts AND between keywords)

A screenshot of a search interface. It features a rectangular frame containing a text input field on the left and a button on the right. The text input field contains the text "happiness chocolate" in a black, sans-serif font. The button is labeled "Search" in a bold, black, sans-serif font. The entire interface is set against a light blue background.

Phrases as keywords

- You can use phrases as keywords
- You indicate it by surrounding the phrase by quotation marks “ “
- Use phrases when you want to search for particular words in a particular order

“South Africa”

“outcomes based education”

“curriculum integration”

- You can also use more than one phrase, e.g.

“global warming” “south africa”

Alternative Keywords

- If your keyword has a synonym or alternative term, how do you indicate this to Google Scholar?
- By putting | (vertical bar) between the keyword and its alternative terms
- Example: Discuss the therapy for tuberculosis
- = therapy|therapies|medicine|medicines|treatment tuberculosis

Excluding keywords

- Some times you want to exclude a keyword from your search results
- For example you want to search for viruses, but not computer viruses
- viruses -computer

ADVANCED SEARCH

Use the Advance Search when:

- You want to search for your keyword in the title of the article and not just in the article's text
- You are looking for a specific article or publication
- You are looking for work by a specific author
- You want to limit your search by date

Example of Advanced Search

[Web](#) [Images](#) [Maps](#) [News](#) [Books](#) [Translate](#) [Gmail](#) [more](#) ▼

Google scholar **Advanced Scholar Search**

[Advanced Search Tips](#) | [About Google Scholar](#)

Find articles	with all of the words with the exact phrase with at least one of the words without the words where my words occur	 deep web tutorial tutorials guide guid anywhere in the article	Results per page: 10 Search Scholar
Author	Return articles written by	 e.g., "PJ Hayes" or McCarthy	
Publication	Return articles published in	 e.g., J Biol Chem or Nature	
Date	Return articles published between	— e.g., 1996	
Collections	Articles and patents		
	☒ Search articles in all subject areas (☒ include patents).		
	☐ Search only articles in the following subject areas:		
	☐ Biology, Life Sciences, and Environmental Science ☐ Medicine, Pharmacology, and Veterinary Science		
	☐ Business, Administration, Finance, and Economics ☐ Physics, Astronomy, and Planetary Science		
	☐ Chemistry and Materials Science ☐ Social Sciences, Arts, and Humanities		
	☐ Engineering, Computer Science, and Mathematics		
	Legal opinions and journals		
	☐ Search all legal opinions and journals.		
	☐ Search only US federal court opinions.		
	☐ Search only court opinions from the following states:		
	☐ Alabama ☐ Florida ☐ Louisiana ☐ Nebraska ☐ Oklahoma ☐ Vermont		
	☐ Alaska ☐ Georgia ☐ Maine ☐ Nevada ☐ Oregon ☐ Virginia		
	☐ Arizona ☐ Hawaii ☐ Maryland ☐ New Hampshire ☐ Pennsylvania ☐ Washington		
	☐ Arkansas ☐ Idaho ☐ Massachusetts ☐ New Jersey ☐ Rhode Island ☐ West Virginia		
	☐ California ☐ Illinois ☐ Michigan ☐ New Mexico ☐ South Carolina ☐ Wisconsin		
	☐ Colorado ☐ Indiana ☐ Minnesota ☐ New York ☐ South Dakota ☐ Wyoming		

Internet

85%

Entering keywords in search boxes

The screenshot shows a search interface with a green background. On the left, under the heading "Find articles", there are five search options: "with all of the words", "with the exact phrase", "with at least one of the words", "without the words", and "where my words occur". On the right, there is a search box containing the text "deep web". Below the search box, there is a list of search results: "tutorial tutorials guide guide", "anywhere in the article" (selected), "anywhere in the article", and "in the title of the article".

- Only use search boxes relevant to your keywords
- **With all the words** = all the keywords must be present in the search results, e.g. happiness chocolate
- **Exact phrase**, e.g. South Africa
- **With at least one of the words** = use this if you want to search for alternative terms for a keyword, e.g. tutorial tutorials guide guides
- **Without the words** = these keyword(s) must be excluded from search results
- **Where my word occur** = choose from anywhere in the article or in the title of the article

Restricting keyword(s) to specific author, publication or date

Find articles	with all of the words with the exact phrase with at least one of the words without the words where my word is	funds anywhere in the article
Author	Return articles by	Smith e.g., "PJ Hayes" or McCarthy
Publication	Return articles from	Journal of finance e.g., J Biol Chem or Nature
Date	Return articles from	1995 — e.g., 1996

If you know the author of the paper you are looking for, you can specify this with your keywords

A publication-restricted search only returns results with specific keyword(s) from a specific publication

Date-Restricted searches can be effective when you are looking for the latest developments in a given area.

Select: All or Specific Subject Areas

Collections Articles and patents

☒ Search articles in all subject areas (☒ include patents).

☐ Search only articles in the following subject areas:

☐ Biology, Life Sciences, and Environmental Science	☐ Medicine, Pharmacology, and Veterinary Science
☐ Business, Administration, Finance, and Economics	☐ Physics, Astronomy, and Planetary Science
☐ Chemistry and Materials Science	☐ Social Sciences, Arts, and Humanities
☐ Engineering, Computer Science, and Mathematics	

Particularly useful if you want to eliminate articles in other subjects where the same word is used with a totally different meaning, e.g. AIDS in the work place.

Legal Articles options

Legal opinions and journals

☐ Search all legal opinions and journals.

☐ Search only US federal court opinions.

☐ Search only court opinions from the following states:

- | | | | | | |
|--|-----------------------------------|--|---|---|--|
| ☐ Alabama | ☐ Florida | ☐ Louisiana | ☐ Nebraska | ☐ Oklahoma | ☐ Vermont |
| ☐ Alaska | ☐ Georgia | ☐ Maine | ☐ Nevada | ☐ Oregon | ☐ Virginia |
| ☐ Arizona | ☐ Hawaii | ☐ Maryland | ☐ New Hampshire | ☐ Pennsylvania | ☐ Washington |
| ☐ Arkansas | ☐ Idaho | ☐ Massachusetts | ☐ New Jersey | ☐ Rhode Island | ☐ West Virginia |
| ☐ California | ☐ Illinois | ☐ Michigan | ☐ New Mexico | ☐ South Carolina | ☐ Wisconsin |
| ☐ Colorado | ☐ Indiana | ☐ Minnesota | ☐ New York | ☐ South Dakota | ☐ Wyoming |
| ☐ Connecticut | ☐ Iowa | ☐ Mississippi | ☐ North Carolina | ☐ Tennessee | |
| ☐ Delaware | ☐ Kansas | ☐ Missouri | ☐ North Dakota | ☐ Texas | |
| ☐ Dist. of Columbia | ☐ Kentucky | ☐ Montana | ☐ Ohio | ☐ Utah | |

- It is likely to list resources that pick up where the original resource left off, either by continuing its studies or updating its findings.

- When something has been cited a lot, it can mean that the resource was foundational, revolutionary, or controversial.

- Remember that more recent works are less likely to have been cited a lot simply because there hasn't been time for new research to emerge.

WHEN FULL-TEXT ACCESS IS NOT AVAILABLE ON GOOGLE SCHOLAR

When Full-text access is not available on Google Scholar

- Google Scholar tries to help you research by giving you citations even when the full-text is not available.
- The library could own a copy of the journal in print, or have an electronic copy that's not linked to Google Scholar
- Write down and keep all necessary citation information for the resource you're interested in.
- For example: **VIEWPOINTS, GENETICS, AND FREE LUNCH.**
By: **Morrison**, Michael L.. Journal of Wildlife Management,
Oct2005, Vol. 69 Issue 4, p1313-1314, 2p;
- Then consult the library catalogue on the library portal or web site.
